THE PROBLEM

Etsy sellers are swimming in signals, drowning in tabs.

Competitor repricing

Your competitors change
prices and listings daily.
You find out too late.

1

Search intent shifts

Buyer keywords evolve with
trends.
Manual SERP checks don't
scale.

2

Social trend spikes

TikTok, Reddit, Instagram
drive Etsy demand.
Most sellers miss the
window.

3

5.6M active Etsy sellers. Zero of them have an always-on market analyst.

THE SOLUTION

One shop URL. Seven agents. Only actionable briefs.

The Judge Agent filters 100% of signals. Only those that cross the actionability threshold reach the seller.
